

PROFESSIONAL SUMMARY

Results-driven IT Specialist with over two years of professional expertise, focusing on complex technical landscapes and delivering comprehensive solutions. Specialized in diagnosing and resolving technical issues related to OS, hardware, and software performance. Proficient in Microsoft Technologies, MS Intune, Manage Engine, and Mimecast. Known for collaborative approach that ensures seamless integration in resolving user issues through ticketing management software, specifically Jira. Committed to staying abreast of industry trends and leveraging innovative technologies to drive continuous improvement in IT Support services.

WORK EXPERIENCE

Freelancer Software Development | *(Online)*

Up Work, Canada

Aug 2024 - Dec 2024

- Built scalable and maintainable frontend and backend components using modern web technologies and object-oriented design principles.
- Implemented secure and efficient database access layers to support reliable data storage, retrieval, and application performance.
- Designed and developed custom full-stack web applications based on client requirements, technical specifications, and business objectives.

IT Engineer | *Onsite*

Tatva Soft, Ahmedabad, IN

Sep 2022 - Nov 2023

- Managed IT inventory in Asset Panda, including loaner equipment tracking.
- Oversaw Windows Server environments, server applications, and (O365) Admin.
- Analyzed Microsoft Defender alerts and phishing incidents, including Mimecast Security.
- Produced weekly software usage and monitoring reports to ensure compliance guidelines.
- Executed server patching and maintenance during scheduled windows using ConnectWise.
- Assisted with audit preparation by gathering documentation and supporting auditor reviews.
- Executed onboarding and offboarding process from account creation to termination in Active Directory.
- Configured and managed Group Policies (e.g., Adobe integration in Outlook, Chrome email restrictions).
- Directed enterprise email security operations with Mimecast, implementing spam filtering and policy creation.
- Managed user access for O365 Dynamics, CrushFTP, Adobe, Zoom, ChatGPT, Talkdesk, NetSuite, and Smartsheet.
- Authored and maintained Jira Confluence documentation (MFA setup, O365 install, VPN, and network drive mapping).
- Delivered end-user support via Jira Service Desk for, Dynamics, Planners, Talkdesk, O365, hardware, and software issues.
- Implemented endpoint management solutions with ManageEngine, automating patching, software deployment, and MDM controls.

Technical Support Representative - Tier II | *Remote*

Code-One Info Hub (MSP), Ahmedabad, IN

Jan 2021 - June 2021

- Led campus Tier 1 - IT operations and Microsoft 365/Azure administration, implementing SSO/MFA, reimaging 3,000+ devices with Intune Autopilot, managed servers, licenses, and access (including 5,000+ LinkedIn Learning licenses and 2,000+ Kantech access cards), and conducted security audits for compliance.

IT Support Technician | *On-Site*

June 2021 - April 2022

- Delivered end-to-end IT support by deploying and maintaining campus-approved hardware/software, onboard users, resolving Microsoft 365 issues, and supporting networking infrastructure.
- Managed IT assets and daily Jira Service Desk tickets, optimized automation tools to cut deployment effort by 30%, led workstation reimaging/deployments, created Jira Confluence documentation, and managed other campus operations.
